Department of **Health**

Western Australia Emergency Access Target

Performance Monthly Report

October 2018

What is the WA Emergency Access Target (WEAT)?

In January 2016, WA Health system established the WA Emergency Access Target (WEAT) to continue to drive local improvement in patient access to emergency services. This replaced the National Emergency Access Target (NEAT) following the expiry of the Commonwealth National Partnership Agreement on Improving Public Hospital Services in 2015.

The WEAT requires 90 per cent of all patients presenting to a hospital emergency department (ED) to be seen and admitted, transferred or discharged within four hours.

What hospitals does it cover?

Child and Adolescent Health Service (CAHS): Perth Children's Hospital and Princess Margaret Hospital.

East Metropolitan Health Service (EMHS): Royal Perth Hospital, Armadale Health Service and St John of God Midland Public Hospital.

North Metropolitan Health Service (NMHS): Sir Charles Gairdner Hospital, King Edward Memorial Hospital and Joondalup Health Campus.

South Metropolitan Health Service (SMHS): Fiona Stanley Hospital, Rockingham General Hospital and Peel Health Campus.

WA Country Health Service (WACHS): Albany Hospital, Broome Hospital, Bunbury Hospital, Busselton Hospital, Carnarvon Hospital, Derby Hospital, Esperance Hospital, Geraldton Hospital, Hedland Health Campus, Kalgoorlie Hospital, Karratha Health Campus, Kununurra Hospital, Narrogin Hospital and Northam Hospital.

Providing the best care

All hospitals and Health Service Providers (HSPs) continue to examine and improve processes across the entire patient journey, from ED and the wards through to hospital discharge.

In 2016–17, Western Australia was the second best performing jurisdiction for patients treated and admitted, transferred or discharged within four hours.

What does this report show?

This performance report shows how HSPs (CAHS, EMHS, NMHS, SMHS and WACHS) are progressing towards the WEAT. For October 2018:

- The statewide number of ED attendances increased by 2.1% (1,663) from October 2017 (78,771) compared to October 2018 (80,434).
- The statewide WEAT performance increased from 73.7% for October 2017 compared to 74.3% for October 2018
- The table of WEAT performance by HSP and hospital (page 4) shows that:
 - At HSP level, WACHS (84.1%) was closest to achieving target of 90%.
 - There was a significant improvement in WEAT performance for the month of October 2018 compared to October 2017 at the following hospitals:
 - Armadale Health Service: 69.5% compared to 67.2%.
 - SJOG Midland Hospital: 71.4% compared to 68.1%.
 - Joondalup health Campus: 64.0% compared to 59.3%.
 - Peel Health Campus: 66.5% compared to 61.4%.
 - Kununurra Hospital: 91.6% compared to 84.1%.

HSPs continue to drive improvement by implementing strategies that are based upon the foundations contained within the Western Australia Emergency Flow Report (May 2014) and more recently developed improvement strategies.

The report also includes total ED attendances, which show trends in demand, and in hospital mortality for admissions from ED which is monitored to ensure patient care remains of the highest priority.

Refer to the Notes section (page 34) and the WEAT Reporting Data Definitions and Business Rules (pages 35 to 37) for information on how to interpret the figures in this report.

WA Emergency Access Target Performance – October 2018

| Health Service Provider | Number of Emergency Department Attendances | | | Percentage of Emergency Department Attendances with Length of Episode of Four Hours or Less | | | | |
|---|--|---------------|----------|---|--------------|-----------------------|----------|-------------|
| | Oct 2017 | Oct 2018 | Variance | Oct 2017 | Oct 2018 | Variance [#] | | |
| Child and Adolescent Health Service (CAHS) | | | | | | | | |
| Perth Children's Hospital/PMH ⁺ | 5,471 | 5,591 | ↑ | 2.2% | 87.2% | 83.3% | ↓ | 3.8% |

Northam Hospital

| October 2018 | | Compared to October 2017 | | |
|--------------|--|--------------------------|-------|--|
| 1,011 | total emergency department attendances | ↑ | 1.8% | increase or 18 more emergency department attendances |
| 84.6% | emergency department attendances with length of episode (LOE) of four hours or less ¹ | ↓ | 3.8% | decrease in emergency department attendances with LOE of four hours or less ¹ |
| 62.8% | emergency department admissions with LOE of four hours or less ¹ | ↓ | 1.2% | decrease in emergency department admissions with LOE of four hours or less ¹ |
| 59.1% | emergency department transfers with LOE of four hours or less ¹ | ↓ | 11.4% | decrease in emergency department transfers with LOE of four hours or less ¹ |
| 90.9% | emergency department departures with LOE of four hours or less ¹ | ↓ | 2.2% | decrease in emergency department departures with LOE of four hours or less ¹ |
| 2.3% | in-hospital mortality for admissions from emergency department | ↓ | 0.3% | decrease in in-hospital mortality for admissions from emergency department |

Figure 24: Northam Hospital – Percentage of ED attendances with length of episode of four hours or less

See Notes on page 34 for additional comments on the figures shown.

Notes:

Figures shown in the tables are preliminary and subject to change due to record review.

The target for all sites is 90% for 2018 and has been implemented as a part of the Western Australia Emergency Access Target (WEAT).

WA health system refers to the public health system in WA as defined in Section 19(1) of the *Health Services Act 2016*. The WA health system comprises the Department of Health, Health Service Providers and contracted health entities 'CHE' (to the extent that CHE provide health services to the State).

- * Contracted Health Entities are Joondalup Health Campus, Peel Health Campus and SJOG Midland Hospital.
- # Figures are rounded to one decimal place. The variance is calculated using actual numbers that contain more than one decimal place, therefore the variance presented may be slightly different to those calculated using the rounded figures.
- ¹ Length of Episode refers to the duration in the emergency department which is counted from the time the patient presents to a staff member (nurse, clerk, etc.) to the time the patient leaves the emergency department.

Western Australia Emergency Access Target (WEAT) – Reporting Data Definitions and Business Rules

1: Emergency department attendances

| | |
|----------------------------|--|
| Definition: | The total number of all emergency department (ED) attendances. |
| Guide for use: | Includes all episodes where a patient presented at the emergency department and was registered in any manner in one of the electronic data collection systems. |
| Purpose: | To provide a fundamental measure of activity levels within emergency departments. |
| Includes: | All participating WEAT hospitals. Refer to page 2. |
| Excludes: | All other public and private hospitals. |
| Data source: | Purchasing and System Performance Division, Department of Health, WA. |
| Data extraction: | Emergency Department Data Collection (EDDC) (05/11/2018). |
| Report prepared by: | Purchasing and System Performance Division, Department of Health, WA. |

2: Emergency department attendances with length of episode (LOE) of four hours or less

| | |
|----------------------------|---|
| Definition: | The percentage of all emergency department attendances where the time to admit, transfer or discharge the patient from the emergency department was within four hours of their presentation. |
| Guide for use: | Includes all valid attendances. Excludes patients that had an invalid presentation or departure time. Data is expressed as a percentage. Length of episode is counted from the time the patient presents to a staff member (nurse, clerk, etc.) to the time the patient leaves the emergency department. |
| Purpose: | To monitor and improve timely access to emergency care for all emergency department attendances. |
| Includes: | All participating WEAT hospitals. Refer to page 2. |
| Excludes: | All other public and private hospitals. |
| Data source: | Purchasing and System Performance Division, Department of Health, WA. |
| Data extraction: | Emergency Department Data Collection (EDDC) (05/11/2018). |
| Report prepared by: | Purchasing and System Performance Division, Department of Health, WA. |

3: Emergency department admissions with length of episode (LOE) of four hours or less

| | |
|----------------------------|---|
| Definition: | The percentage of all admissions from the emergency department where the time to admit the patient to a ward was within four hours of their presentation. |
| Guide for use: | <p>An admission process is the process whereby the hospital accepts responsibility for the patient's care and/or treatment.</p> <p>Includes all attendances that were admitted.</p> <p>Excludes patients that had an invalid presentation or departure time.</p> <p>Data is expressed as a percentage.</p> <p>Length of episode is counted from the time the patient presents to a staff member (nurse, clerk, etc.) to the time the patient leaves the emergency department by being admitted to a ward (including Short Stay Unit).</p> |
| Purpose: | To monitor and improve timely access to emergency care for emergency department patients who are admitted to a hospital inpatient ward. |
| Includes: | All participating WEAT hospitals. Refer to page 2. |
| Excludes: | All other public and private hospitals. |
| Data source: | Purchasing and System Performance Division, Department of Health, WA. |
| Data extraction: | Emergency Department Data Collection (EDDC) (05/11/2018). |
| Report prepared by: | Purchasing and System Performance Division, Department of Health, WA. |

4: Emergency department transfers with length of episode (LOE) of four hours or less

| | |
|----------------------------|---|
| Definition: | The percentage of all emergency department transfers where the time to transfer the patient to another hospital was within four hours of their presentation. |
| Guide for use: | <p>Includes all attendances that were transferred to another hospital on ED departure.</p> <p>Excludes records with an invalid presentation or departure time.</p> <p>Data is expressed as a percentage.</p> <p>Length of episode is counted from the time the patient presents to a staff member (nurse, clerk, etc.) to the time the patient leaves the emergency department to be transferred to another hospital.</p> |
| Purpose: | To monitor and improve timely access to emergency care for emergency department patients who are transferred to another hospital. |
| Includes: | All participating WEAT hospitals. Refer to page 2. |
| Excludes: | All other public and private hospitals. |
| Data source: | Purchasing and System Performance Division, Department of Health, WA. |
| Data extraction: | Emergency Department Data Collection (EDDC) (05/11/2018). |
| Report prepared by: | Purchasing and System Performance Division, Department of Health, WA. |

5: Emergency department departures with length of episode (LOE) of four hours or less

| | |
|----------------------------|--|
| Definition: | The percentage of emergency attendances who were discharged to home within four hours of their presentation. |
| Guide for use: | Includes all attendances that were not admitted or transferred. Excludes records with an invalid presentation or departure time. Data is expressed as a percentage. Length of episode is counted from the time the patient presents to a staff member (nurse, clerk, etc.) to the time the patient is discharged from the emergency department. |
| Purpose: | To monitor and improve timely access to emergency care for emergency department patients who are discharged to home. |
| Includes: | All participating WEAT hospitals. Refer to page 2. |
| Excludes: | All other public and private hospitals. |
| Data source: | Purchasing and System Performance Division, Department of Health, WA. |
| Data extraction: | Emergency Department Data Collection (EDDC) (05/11/2018). |
| Report prepared by: | Purchasing and System Performance Division, Department of Health, WA. |

6: Percentage of in hospital mortality for admissions from emergency department

| | |
|----------------------------|---|
| Definition: | The percentage of hospital inpatients who were admitted from emergency department and subsequently deceased during the hospital stay. |
| Guide for use: | Excludes patients that are deceased in the emergency department who are not admitted and patients directly admitted to a hospital ward. |
| Purpose: | To monitor and improve quality of care for patients who are admitted to a hospital inpatient ward from emergency department. |
| Includes: | All participating WEAT hospitals. Refer to page 2. |
| Excludes: | All other public and private hospitals. |
| Data source: | Purchasing and System Performance Division, Department of Health, WA. |
| Data extraction: | Inpatient Activity (06/11/2018). |
| Report prepared by: | Purchasing and System Performance Division, Department of Health, WA. |

This document can be made available in alternative formats on request for a person with disability.
