[^] Mandurah Community Health Centre is not a DTU but is currently an established pathway for Falls Specialist referrals and is included here for completeness.

Contact details for rural and regional falls services available at Day Therapy Units in WA

No direct onsite Falls Specialist Service is currently available in rural and regional areas. The expansion of WA Day Therapy Unit (DTU) services in the regions and the Falls Specialist Coordinator Program within the Perth Metropolitan Area with funding from the [Subacute Care Plan 2009-2013](#) highlighted the need for documentation of linkages between Metropolitan and WACHS DTU sites to facilitate the exchange of clinical knowledge and skills. Several WACHS regions have recently developed or are developing DTUs and all WA services are prioritising a consistent, best practice approach to care provision. Closer linkages between Metro and WACHS sites will promote more consistent and equitable DTU service across WA.

The relationship between Metropolitan Falls Specialists and WACHS DTU/regional sites provides opportunities to facilitate the exchange of skills in the area of falls prevention and build on existing professional relationships between individual clinicians and services. In terms of clinical care of patients, these linkages provide the opportunity for clinical staff in the regions to contact Metropolitan colleagues with regards to clinical issues pertaining to falls. Opportunities exist for video and case conferencing of complex clients at risk of falls who are assessed in rural and regional areas, providing an opportunity to enhance care of patients and learning for clinicians.
