

## Hospital Major Incident Medical Management and Support (HMIMMS)

Hospital MIMMS (HMIMMS) is the leading course for hospital staff responsible for planning, training and managing aspects of a major incident from a hospital perspective, with course objectives including:

- The type and incidence of major incidents and therefore the need for proper response and management planning.
- Understand and able to implement and follow the seven principles encapsulated in the CSCATTT approach to successfully managing a major incident.
- Understand the need for major incident training—focusing on those aspects of the plan which do not occur in day-to-day practice, i.e., command, control, communication and triage.
- Able to deliver the medical support needed for major incidents in the hospital setting using the concept of ‘collapsible hierarchies’

While traditional MIMMS teaches a structured approach to responding at the scene of mass casualty incidents, Hospital MIMMS (HMIMMS) focusses on the delivery of care in the hospital environment. See below HMIMMS courses DPMD are offering:

### HMIMMS Team Member (1 day)

### HMIMMS Advanced (2 days)

#### Aim

These course explores the priorities and responsibilities of clinical and administrative responders facing a mass casualty incident in their hospital. An all-hazards approach is adopted while special incidents such as burns and chemical hazards are also covered. The concept of the collapsible hierarchy is introduced as a fundamental concept in the hospital based response.

#### Course Content

- lectures
- small group workshops
- novel interactive sessions which simulate the challenges facing responders during phases of patient reception, definitive care and recovery

#### Target Audience

*Team:* Aimed at both clinical and non-clinical personnel who would be responsible for planning, training and managing a major incident.

*Advanced:* As above but in a senior roles.

**HMIMMS certification is valid for four years.**
